# VILA-SECA

**Vila-seca** is a municipality which looks to the future with optimism. Principally because our citizens are enterprising and versatile who love their municipality and know that diversity, cohesion and the job well done are their strength. Also, we live in a prosperous Vila-seca which has managed to combine different areas of economic activity: The beautiful countryside and a strong cultural heritage; world class tourist and leisure installations; commerce and services, a large and kind land which comes from an important agricultural tradition and a strong industrial element which adds to our riches.

The most important however, is our own identity as a town, the sum total of people, of collective aspirations and economic opportunities is the foundation of a well equipped path, which has the solidarity, the sustainability and quality of life as its objectives.

The Vila-secans hold Vila-seca in their hearts and their greatest wish is that those who know us or visit us feel the same. In these pages Vila-seca looks to the future and hopes to share it with you.
